Katello - Bug #37053

hammer host list does not print parameters even if they are present in the fields list like LCE and CVs

01/15/2024 06:00 PM - Chris Roberts

Pull request:	https://github.com/Katello/hammer-cli-katello/pull/922		

Description

Description of problem:
After upgrade to Satellite 6.14 hammer cli command "hammer host list" does no longer display information about lifecycle environments and content views not via "DEFAULT" or "ALL" or even if specifically requested via --fields option. It is only visible for each host when using "hammer host info --name <servername>".

Example output:
[XXX@satellite ~]$ hammer host list --per-page 2

```
-----|---------------------------------|-----------------|-----------|--------------|------------------|-------------
ID   | NAME                            | OPERATING SYSTEM | HOST GROUP | IP           | MAC              | GLOBAL STATUS
-----|---------------------------------|-----------------|-----------|--------------|------------------|-------------
1915 | xxx                             | RedHat 8.7      |           | 10.xx.xxx.xx | 00:50:56:8a:da:XX | Error
```

Version-Release number of selected component (if applicable):
Satellite 6.14.
Until 6.13 it was showing the LCE and CV details.

Actual results:
satellite ~]$ hammer host list --per-page 2

```
-----|---------------------------------|-----------------|-----------|--------------|------------------|-------------
ID   | NAME                            | OPERATING SYSTEM | HOST GROUP | IP           | MAC              | GLOBAL STATUS
-----|---------------------------------|-----------------|-----------|--------------|------------------|-------------
1915 | xxx                             | RedHat 8.7      |           | 10.xx.xxx.xx | 00:50:56:8a:da:XX | Error
```

Expected results:
To list LCE and CV details.
