Triaged:	Yes	Found in Releases:
Bugzilla link:	2254712	Red Hat JIRA: SAT-21958
Pull request:	https://github.com/foreman/foreman/pull/9994 , https://github.com/foreman/foreman/pull/10037	

Description

Description of problem:

To make some comparison, if we reduce the browser's page size, the Satellite Web UI page does not show which Organization and Location is selected/currently in use.

Version-Release number of selected component (if applicable):

Red Hat Satellite 6.15
satellite-6.15.0-2.el8sat.noarch

How reproducible:

100%

Steps to Reproduce:

1. Login to Satellite web UI.
2. Reduce the size to small or shift the web browser to the left or right of the screen.
3. The location and Organization options will shift to the bottom of the sidebar.

Actual results:

We can not see which Organization and Location currently is in use.

Refer to the attached screenshot compared with Satellite version 6.15 and 6.13.

Expected results:

Organization and Location should show selected in the sidebar as well.

Additional info:

Yes, we can change the page size and can see the selected organization and location, however the side bar should show the same, for ease of use.
