Description	
<p>On the “All Hosts” page → “Installable Updates” column, i have a host with “RPM package updates”=42 & the icon next to 42 is a link to: https://foremanhost/new/hosts/clienthostname#/Content/packages?status=Upgradable</p>	
<p>This is absolutely no good, it needs to be changed to: https://foremanhost/content_hosts/31/packages/applicable</p>	
<p>Reason: On All Hosts page the originating field is displaying a count (in my case 42) SUPPOSEDLY of available/applicable update packages. So if you click on this that’s what you want to see, the 42 available update packages, not something completely different.</p>	
<p>But, sadly if you click on the "Content/packages?status=Upgradable" link shows it completely different info. It lists the currently installed packages for which there are updates (in my case, 11), which is a completely different thing to the number of update rpms available (42).</p>	
<p>HOWEVER! On the “Content Hosts” page → “Installable Updates” column, we have the same numbers as on the “All Hosts” page → “Installable Updates” column, eg in my case:</p>	
<p>6 Security, 0 BugFix, 0 Enhancements, 42 “rpm Package Updates” Here though, on the Content Hosts page, the icon next to 42 is a link to: https://foremanhost/content_hosts/31/packages/applicable</p>	
<p>This CORRECTLY displays the 42 available rpm package updates. So THIS is the link that we SHOULD also have on the “All Hosts” page → “Installable Updates” column -> “RPM package updates”</p>	
<p>Please fix the link at: “All Hosts” page → “Installable Updates” column -> “RPM package updates” And change it from: blah/packages?status=Upgradable to: blah/content_hosts/XX/packages/applicable</p>	
<p>Thanks</p>
