

Foreman - Bug #37071

FetchPxeFiles fails when syncing Fedora ELN

01/19/2024 04:35 PM - Ian Ballou

Status:	New	
Priority:	Normal	
Assignee:		
Category:		
Target version:		
Difficulty:		Fixed in Releases:
Triaged:	No	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:		

Description

Repo: https://odcs.fedoraproject.org/composes/production/latest-Fedora-ELN/compose/BaseOS/x86_64/os/

Error:

```
ActiveRecord::RecordInvalid
```

```
Validation failed: Major version is not a number
```

```

History

#1 - 01/21/2024 11:23 AM - Lukas Zapletal

I think what is also missing is OperatingSystem entry, it was not created. This is caused because version major/minor fields in DB must be numbers, but for Fedora ELN it is likely a string or something.

#2 - 01/21/2024 11:24 AM - Lukas Zapletal

When testing this, maybe also test Fedora Rawhide this could be also helpful. But I think in that case version is set to N+1 so it will work.

#3 - 01/24/2024 06:56 PM - Partha Aji

- Triaged changed from No to Yes

#4 - 03/19/2024 03:39 PM - Ian Ballou

[@Leos Stejskal](#) or [@Nofar Alfassi](#) , Foreman operating systems force a numerical value <https://github.com/theforeman/foreman/blob/6c77d09b44456bc1770f0264f41c1238557c64fa/app/models/operatingsystem.rb#L25C21-L25C39>

Would it be reasonable to start allowing strings? It seems Fedora ELN doesn't have an actual number for its version.

The other option I see would be to spoof a number, but that seems hacky.

#5 - 03/19/2024 03:39 PM - Ian Ballou

- Status changed from New to Need more information

#6 - 03/27/2024 01:33 PM - Quinn James

- Target version deleted (Katello 4.12.0)

- *Triaged changed from Yes to No*

Removing target version for 4.12 RC/GA re-triage

#7 - 03/28/2024 10:11 AM - Ewoud Kohl van Wijngaarden

Fedora ELN doesn't have a version at all, like Arch Linux and Gentoo because they're rolling. Perhaps Foreman should make the operating system's version field optional. It will be a major change because a lot of code has been built with the assumption, but one with multiple real world examples.

The alternative is to make ELN (or Rawhide) the version, but changing numeric to a pure string will also mean checking all the same code paths. It's still a good thing, because you can encode Ubuntu's 24.04 as the major version that it is instead of splitting it up to 22 and 4 while discarding the true minor version.

#8 - 04/03/2024 05:40 PM - Samir Jha

- *Project changed from Katello to Foreman*

- *Category deleted (Repositories)*

- *Status changed from Need more information to New*

Moving to foreman project since the changes requested here will need to be made in foreman.
