

Katello - Tracker #37076

make it possible to run seeds/migrations after foreman was fully migrated/seeded

01/22/2024 08:15 AM - Evgeni Golov

Bugzilla link:	Red Hat JIRA:
Description Rails executes migrations in order of their versions, regardless whether they come from core or from a plugin. This works fine when you migrate/seed both in one go (= install both gems, run db actions), but not if you install Foreman first and then try to add Katello on top. This issue is a tracker for all the existing bugs that need to be fixed in order to make it possible to perform Katello DB actions after Foreman has been fully installed.	
Subtasks:	
Bug # 37073: Migration error 'column settings.category does not exist'	Closed
Bug # 37074: Migration error 'users.disabled' already exists	Closed
Bug # 37075: Invalid single-table inheritance type: ConfigManagementError is not a subc...	Closed
Bug # 37077: undefined method `repository_url' for nil:NilClass	New
