Refs #37102 - detect plugins webpack by looking for remoteEntry.js

Since we switched to Webpack 5, there are no more manifest.json in the plugins webpack folder, but we need some token to detect that we gotta load webpack stuff.

Refs #37102 - Read real webpack manifest in test

In some test cases (like controller tests) the real manifest isn't needed, but in integration tests they are.

Rails has deprecated controller tests in favor of integration tests, but Foreman still has them. This modifies the fake read\_webpack\_manifest to read the manifest if available, otherwise pretend it's there.
