<b>Pull request:</b>	<a href="https://github.com/Katello/katello/pull/10895">https://github.com/Katello/katello/pull/10895</a>	

#### Description

Description of problem:

`hammer content-view version info --include-applied-filters true` shows new details about the filter rules now. Here are some suggestions for further improvement:

1. Filters always show the `Original packages` and `Original module streams` fields regardless the filter type. `Original packages` should be displayed for RPM filters only and `Original module streams` should be displayed for Module stream filter only.

```
[root@sat ~]# hammer content-view version info --include-applied-filters true --id 18
```

...

Has Applied Filters: yes

Applied Filters:

...

```
5) Id: 8
Name: Container image tag filter
Type: docker
Inclusion: yes
```

```
Original packages: no <=====
```

```
Original module streams: no <=====
```

Rules:

```
1) Id: 1
Name: latest
```

Content view filter Id: 8

3. Filter rule info does not provide much useful information for some filter types, like modulemd. It should provide more info.

```
[root@sat ~]# hammer content-view filter rule info --content-view-filter-id 9 --id 1
```

```
Rule ID: 1
```

```
Filter ID: 9
```

```
Created: 2023/08/03 13:26:48
```

```
Updated: 2023/08/03 13:26:48
```

Version-Release number of selected component (if applicable):

6.14.0

How reproducible:

always

Steps to Reproduce:

1. Run `hammer content-view version info --include-applied-filters true --id <cvv\_id>` for some CVV with appropriate filters and rules applied.
2. Run `hammer content-view filter rule info --content-view-filter-id <cvf\_id> --id <rule\_id>`
