<b>Description</b> <a href="https://github.com/Katello/katello/pull/10900">https://github.com/Katello/katello/pull/10900</a> introduced a new REX feature to force-upload package profiles from hosts. There are a few places in the frontend where we currently use the "Run command" feature to do that, but this new force_upload feature is more reliable since it not only runs subscription-manager repos, but also dnf uploadprofile --force-upload. We should change the frontend to use the new feature.  Files changed by these two original PRs will need updates: <a href="https://github.com/Katello/katello/pull/10501/files">https://github.com/Katello/katello/pull/10501/files</a> <a href="https://github.com/Katello/katello/pull/10757/files">https://github.com/Katello/katello/pull/10757/files</a>
