

Foreman - Bug #37243

Calling the api/v2/operatingsystems#bootfiles endpoint results in unknown requirements

03/12/2024 12:42 PM - Richard Stempf

Pull request:	
Description Follow up of Bug #35055 If i call the api endpoint <code>api/v2/operatingsystems/:id/bootfiles</code> it now results in <code>{"message":"Couldn't find Medium without an ID"}</code> The apidoc only mentions "id" as required. I also can not guess what medium id it wants, i´ve tried some bu none did work.

You need to add the medium and arch like this:

<https://foreman.host/api/v2/operatingsystems/2/bootfiles?medium=16&architecture=1>

And you need to have this fix: <https://github.com/theforeman/foreman/pull/10096>

And you should consider, that this API is deprecated:

https://github.com/theforeman/foreman/blob/b0efc769b9b800f6ecf3b14738ed906cec27f222/app/controllers/api/v2/operatingsystems_controller.rb#L91
