Description		
The packaging of puppetserver doesn't ensure properly that it uses the correct JRE because it uses /usr/bin/java which can point at any version, which causes problems on upgrade.		

Associated revisions

Revision b6088261 - 03/22/2024 05:04 PM - Ewoud Kohl van Wijngaarden

Fixes #37291 - Use explicit java on RH with Puppetserver 8

The /usr/bin/java file may point to any version. This changes the logic to determine the java version (unless explicitly specified) dynamically based on the puppetserver version and the OS.

Revision 19310592 - 03/22/2024 06:42 PM - Ewoud Kohl van Wijngaarden

Refs #37291 - Reset Puppet's java_bin

In theforeman/puppet 19.2.0 the puppet::server_jvm_java_bin parameter was changed to undef and determined at runtime. This helps with Puppet 8 upgrades.

Revision f7249849 - 03/23/2024 12:43 PM - Ewoud Kohl van Wijngaarden

Refs #37291 - Only reset puppetserver's JVM if it's /usr/bin/java

The intent was to only reset it if it was the default value, not just any value.
