

Foreman - Bug #37292

Global registration template ignores errors in curl calls leading to failed registrations that appear as successful

03/22/2024 04:25 PM - pablonh please_edit_me

Status: Ready For Testing	
Priority: Normal	
Assignee:	
Category: Host registration	
Target version:	
Difficulty: easy	Fixed in Releases:
Triaged: No	Found in Releases: 3.3.2, 3.5.4, 3.7.1, 3.9.2, Nightly
Bugzilla link: 2271092	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/10109	
Description	
The return codes from curl POST calls inside the global registration script are not checked, and when those calls return an error code (!= 2xx), the script doesn't report a failure and it reports a successful registration when it hasn't been.
