Pull request:	https://github.com/theforeman/foreman-installer/pull/924		

Description

PostgreSQL supports SCRAM encryption and PostgreSQL 14 will also default to this. Moving to it sooner helps removing md5 from the system.

https://github.com/puppetlabs/puppetlabs-postgresql/pull/1313 added some initial SCRAM support to the installer (foreman-installer 3.3) and https://github.com/puppetlabs/puppetlabs-postgresql/pull/1406 changes the default encryption to SCRAM on PostgreSQL 14, reflecting PostgreSQL defaults (foreman-installer 3.9). It should be possible to set the installer wide default to SCRAM now using Hiera.
