

Foreman Remote Execution - Bug #37305

Remote execution ignores default values for template inputs when triggering jobs through the api

03/27/2024 01:16 PM - Adam Ruzicka

Status:	Closed	
Priority:	Normal

Triaged:	No	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/foreman/foreman_remote_execution/pull/880	

Description

Steps to reproduce:

- 1) Import the attached job template
- 2) Try to run it with curl without providing a value for the foo input

```
curl -u admin:changeme http://foreman-r3.orb.local:5000/api/v2/job_invocations -X POST -d '{"job_invocation": {"job_template_id": 187, "search_query": "name ~ *", "targeting_type": "static_query", "inputs": {}}}' -H 'Content-Type: application/json'
```

Note, the template had id 187 on my box

```
<%#
name: Foo
snippet: false
template_inputs:
- name: foo
  required: false
  input_type: user
  advanced: false
  value_type: plain
  default: '1'
  hidden_value: false
model: JobTemplate
job_category: Miscellaneous
provider_type: script
kind: job_template
organizations:
- Default Organization
locations:
- Default Location
%>

<%= input['foo'] %>
```
