### Description

In foreman-installer 2.0 we updated the ciphers for puppetserver, but didn't introduce a migration to update existing installations. Users from very old installs will still use the insecure ciphers. This breaks on FIPS and leaves other users more vulnerable than they need to be.

The commit in question was: https://github.com/theforeman/puppet-puppet/commit/8cc4e3094d5bbd6d05d794e087816934e1697a87

Fixes #37306 - Reset Puppetserver ciphers if needed

In foreman-installer 2.0 we updated[1] the ciphers for puppetserver, but didn't introduce a migration to update existing installations. Users from very old installs will still use the insecure ciphers. This breaks on FIPS and leaves other users more vulnerable than they need to be.
