<b>Pull request:</b>	<a href="https://github.com/foreman/foreman/pull/10113">https://github.com/foreman/foreman/pull/10113</a>	
<b>Description</b>		
In case this component is mounted into a custom/embedded table it should be able to persist selected items between renders.		
Also, it would be handy to have Select default option in case Select none doesn't make sense if one of the items must be selected.
