<b>Description</b> <p>On the host edit screen, we disabled changing the CV/LCE a while ago for existing hosts, and instead link to the "Change Content Source" page. But when you just want to change cv/lce and not content source, it's unclear what to do. (the answer is to click "Update hosts manually" but then not do the manual step.)</p> <p>If the selected content source would be unchanged, we shouldn't show "Run job invocation" or "Update hosts manually"; rather, there should just be a single button that says "Save" or something.</p>
