Pull request:	https://github.com/theforeman/foreman-documentation/pull/2970 , https://github.com/theforeman/foreman-packaging/pull/10723	
Description		
<p>EL 9 contains keycloak-httpd-client-install 1.1 which is new enough to provide all the features we need. Initially it was shipped because EL7 contained keycloak-httpd-client-install 0.8 which lacked OIDC support, but EL8 contains 1.0 which is new enough. That's broken due to https://issues.redhat.com/browse/RHEL-31496 while our version works. So it's easier to leave that be for now.</p> <p>Since EL9 is a relatively new platform I'm proposing to drop our packaged version. It's newer than EL9 (version 1.2) and I propose to tackle with a release note. Additionally we should care about this when upgrading through leapp.</p>

Fixes #37334 - Drop keycloak-httpd-client-install from EL9

EL9 BaseOS contains a new enough version (1.1). Initially it was packaged because EL7 only contained 0.8 which lacked OIDC support. EL8 is also new enough, but contains a bug¹. EL9 support was only introduced in Foreman 3.10 as experimental so there's probably still only a small userbase to have it installed. A release note should suffice.
