Pull request:	https://github.com/Katello/katello/pull/10963		

Description

Description of problem:
Subscription-manager release --unset doesn't reset the client information on Red Hat Satellite

Version-Release number of selected component (if applicable):
Satellite 6.x

How reproducible:
Unset Subscription-manager release on the client and check info on satellite.

Steps to Reproduce:
1. Subscription-manager release --unset
2. Subscription-manager release --show
3. Subscription-manager facts --update

Actual results:
Release Version remains the same on the foreman DB

Expected results:
Release Version should be updated on the foreman DB

Additional info:
Also Subscription-manager facts --update doesn't refresh release information
