

Katello - Bug #37380

Container push can fail with a different JSON error

04/23/2024 05:50 PM - Ian Ballou

Status:	Closed

Triaged:	Yes	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/Katello/katello/pull/10977	

Description

In `http_resource.rb`, there's the following code:

```
def issue_request(method:, path:, headers: {}, payload: nil)
  logger.debug("Resource #{method.upcase} request: #{path}")
  logger.debug "Headers: #{headers.to_json}"
  begin
    logger.debug "Body: #{filter_sensitive_data(payload.to_json)}"
  rescue JSON::GeneratorError
    logger.debug "Body: Error: could not render payload as json"
  end
end
```

The last `logger.debug` might cause an `Encoding::UndefinedConversionError` error instead of a `JSON::GeneratorError`.
