Description	
<p>Using Firefox ESR 17.0.7 as supplied by Scientific Linux release 6.4 (Carbon), using the middle mouse button to open links in new tabs doesn't work in the foreman application. E.g.: in the host list clicking on a hostname (first column) doesn't do anything. The same browser and other websites do work, also other browsers and foreman do so.</p> <p>This makes the foreman very annoying to work with.</p>
