Fixes #379 - Additional settings dropdown not showing in narrow browsers

I have now tested that the "additional settings" dropdown is visible on the right hand of the browser window on 1600x1024 and on 640x1024. If the window is narrower than this then the menu starts wrapping. It should be possible to fix this but i do not believe that anyone will ever complain about a screen narrower than 640.
