<b>Description</b>	
<a href="https://github.com/theforeman/foreman/blob/develop/app/controllers/api/base_controller.rb?source=cc#L35">https://github.com/theforeman/foreman/blob/develop/app/controllers/api/base_controller.rb?source=cc#L35</a>	
<pre>def resource_class   @resource_class   = resource_name.classify.constantize end</pre>	
When katello engine api controllers extend Foreman::Api::V2::BaseController and attempt to use the base helper methods such as	
<pre>before_filter :find_resource</pre>	
the 'resource_class' fails because it cannot find the class.	
If the foreman core is going to truly support engines, this needs to be fixed.
