<b>Description</b>	
Hello,	
In foreman 1.2.0 setting a smart variable to the following will make all hosts in that environment inaccessible through forman (both UI and for yam facts). Trying to edit the host shows the following:	
<pre>undefined method `&lt;' for nil:NilClass  NoMethodError undefined method `&lt;' for nil:NilClass app/models/classification/base.rb:64:in `block (2 levels) in values_hash' app/models/classification/base.rb:54:in `block in values_hash' app/models/classification/base.rb:53:in `each' app/models/classification/base.rb:53:in `values_hash' app/models/classification/base.rb:16:in `inherited_values' app/views/puppetclasses/_class_parameters.html.erb:2:in `_app_views_puppetclasses__class_parameters_html_erb__3825486531141653683_69928692138800' app/views/puppetclasses/_classes_parameters.html.erb:12:in `_app_views_puppetclasses__classes_parameters_html_erb__1221309847069606095_69928692280220' app/views/hosts/_form.html.erb:83:in `block (2 levels) in _app_views_hosts__form_html_erb__1154123526843938245_69928694609080' app/helpers/layout_helper.rb:211:in `form_for' app/views/hosts/_form.html.erb:7:in `block in _app_views_hosts__form_html_erb__1154123526843938245_69928694609080' app/models/taxonomy.rb:55:in `block (2 levels) in as_taxonomy' lib/foreman/thread_session.rb:140:in `as_location' app/models/taxonomy.rb:54:in `block in as_taxonomy' lib/foreman/thread_session.rb:105:in `as_org' app/models/taxonomy.rb:53:in `as_taxonomy' app/views/hosts/_form.html.erb:5:in `_app_views_hosts__form_html_erb__1154123526843938245_69928694609080' app/views/hosts/edit.html.erb:7:in `_app_views_hosts_edit_html_erb__838330452706467575_69928694593680' lib/foreman/thread_session.rb:31:in `clear_thread'</pre>	
Issue is caused by setting the following smart variable for a puppet class: match: environment=<env name> value: 1	
while not having environment specified in the Order box. The moment I add environment to the order box the hosts in that environment are available again.
