

Foreman - Bug #3828

API messages and error responses not in English

12/06/2013 11:05 AM - Dominic Cleal

Status: Closed	
Priority: Normal	
Assignee: Joseph Magen	
Category: API	
Target version: 1.4.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>The error responses from the API are often shown in languages other than English, seemingly random. For example:</p> <pre>Started POST "/api/smart_proxies" for 10.35.160.133 at 2013-12-05 17:01:27 +0200 Processing by Api::V1::SmartProxiesController#create as JSON Parameters: {"smart_proxy"=>{"url"=>"https://example.redhat.com:9090", "name"=>"example.redhat.com"}} Authorized user admin (Admin User) Unprocessable entity SmartProxy (id: new): No ha sido posible establecer una comunicaci3n con el proxy: SSL_connect returned=1 errno=0 state=SSLv3 read server certificate B: certificate verify failed Por favor, comprueba que el proxy est1 configurado y ejecut1ndose en el equipo</pre> <p>I suspect we're not initialising the current locale correctly in the API controllers, while we do in the UI controllers based on the user.</p> <p>(https://bugzilla.redhat.com/show_bug.cgi?id=1039011)</p>
