Pull request:		
Description		
[Cloning as we missed /fact_values]		
In 1.2.2, when fact filters are added to a user, this error is displayed when trying to view /dashboard or /fact_values		
Started GET "/" for x.x.x.x at 2013-09-19 10:43:17 -0400		
Processing by DashboardController#index as HTML		
Rendered dashboard/_status_table.html.erb (9.3ms)		
Rendered dashboard/index.html.erb within layouts/application (21.1ms)		
Operation FAILED: PGError: ERROR: column reference "id" is ambiguous		
LINE 1: SELECT id FROM "hosts" INNER JOIN "fact_values" ON "fact_val...		
^		
: SELECT id FROM "hosts" INNER JOIN "fact_values" ON "fact_values"."host_id" = "hosts"."id" WHERE "hosts"."type" IN ('Host::Managed') AND (((hosts.id = fact_values.host_id and fact_values.fact_name_id = 798 and fact_values.value = 'factname')))		
Rendered common/500.html.erb within layouts/application (6.6ms)		
Completed 500 Internal Server Error in 101ms (Views: 7.9ms ActiveRecord: 0.6ms)		
Seems like same issue as http://projects.theforeman.org/issues/2579

History

- #1 - 12/12/2013 08:35 AM - Dominic Cleal
 - Copied from Bug #3122: when fact filters are added to a user, error column reference "id" is ambiguous for dashboard and fact_values added
- #2 - 01/02/2014 03:13 PM - Dominic Cleal
 - Related to Bug #2579: Host groups with puppet classes triggers: column 'id' in field list is ambiguous added
- #3 - 04/09/2014 07:42 PM - m w

still exists in 1.4.2

easy fix:

```
#done via INNER select automatically
  where(:fact_values => { :host_id => Host.my_hosts.pluck('hosts.id') })
```
- #4 - 04/09/2014 07:54 PM - Dominic Cleal
 - Status changed from New to Resolved
 - Target version set to 1.8.4
 - translation missing: en.field_release set to 4

The authorization system has been rewritten in Foreman 1.5 and fact filters have become generic role filters, so this should be resolved in the

upcoming release.
