Foreman - Bug #3890

Importing ~1000 of puppet classes takes a while

12/16/2013 07:46 PM - Lukas Zapletal

Description

Mike reported with a RHEL6 installation that it took 72 seconds to import. We should check performance of the import and at least make some suggestions in the documentation how to speed this up (maybe Ruby 1.9 for smart proxy, newer Puppet or some other optimalization).

Low prio.
