Description

Running plain "foreman-installer" on nightly on Ubuntu 12.04 gives the following error:

```
 /Stage[main]/Apache::Service/Service[httpd]: Failed to call refresh: Could not start Service[http
d]: Execution of '/etc/init.d/apache2 start' returned 1:  at /usr/share/foreman-installer/modules/

Fixes #3977 - Don't re-open a Highline colourscheme

History

#1 - 01/09/2014 08:36 AM - Dominic Cleal

```
||/ Name                 Version              Description
+++-=====================-=====================-======================================================
ii  foreman-installer    9999-precise+scratch Automated puppet-based installer for The Foreman
ii  ruby-highline        1.6.2-1              High-level interactive IO Ruby library
ii  ruby-kafo            0.3.4-1              If you write puppet modules for installing your software
```

An older version of highline in 12.04 compared to the 1.6.19/20 builds we use on Debian and in the RPMs. Marek says this probably affects kafo itself too.
