

Foreman - Bug #3994

Cannot properly 'Resolve' finish scripts for Openstack

Description	
<p>When you try to create a new host for an Openstack cluster and select all of the host settings including 'Operating System' configuration options you cannot properly get 'Resolve' to find a provisioning template (or find one automatically). When you select 'Resolve' it returns 'Sorry but no templates were configured.'. This is not the case as the finish template is specified for the OS being used.</p> <p>Now, here's where I believe it's a bug. If you hit 'submit' Foreman returns an error that you need to select an OS. You then re-select the OS and click 'Resolve'. At that time it NOW finds the proper provisioning/finish template and you are then able to hit submit and create the host.</p>

- Status changed from New to Need more information

I'm not sure I follow - you say you selected an Operatingsystem, but then Foreman throws an error saying you need to select an Operatingsystem? That sounds more like the real problem here...
