Category: PuppetCA	
Target version: 0.3	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description A Puppetca Monitor should have the possibility to clean/list/ revoke/sign puppet certs and certrequests. The benefit would be to have a simple interface for people that should be able to add a bunch of new hosts quickly to the system without using auto-sign or the -all option of puppetca.
