Foreman - Bug #4007

Users email is not mandatory on creation but it is on update

01/14/2014 07:22 AM - Daniel Lobato Garcia

Pull request:	https://github.com/theforeman/foreman/pull/9279		

Description

https://github.com/theforeman/foreman/blob/develop/app/models/user.rb#L39

This is rather odd as it allows users to not have a mail, but if you edit them you are forced to set an email.

Revision db023da3 - 07/25/2022 11:47 AM - Nofar Alfassi

Fixes #4007 - updating users email to be optional (#9279)

History

#1 - 01/14/2014 08:20 AM - Dominic Cleal

It's a bit weird, but I think it's meant so a user can be created from some external auth source without an e-mail address, but then they're forced to set one on login. However this currently also applies to the admin if they edit the user again, so perhaps it should still be optional if an admin is saving the user? Or it just needs redesigning.

#2 - 01/14/2014 05:18 PM - Daniel Lobato Garcia

If nothing depends on it, I'd fully remove the validator. I guess it won't wreck anything since there already could be users without email.

#3 - 01/15/2014 08:56 AM - Dominic Cleal

The only thing that would use it are the e-mails on failed reports (to the owner), so check there's a fallback or at least graceful exit in these cases. We could keep the validator, but permit an empty e-mail address too.

#4 - 01/16/2014 08:21 AM - Lukas Zapletal

I have entering an email address **everywhere** - e.g. I am evaluating a software, I know I will not be sending any reports and I need to enter it. I vote for optional e-mail address and changing our sender helper. If the e-mail provided was nil, let's just put warning in logs and skip the send.

#5 - 03/06/2014 06:40 PM - John Julien

+1 for optional

#6 - 06/01/2022 07:29 AM - Marek Hulán

This was discussed again recently https://community.theforeman.org/t/kerberos-cross-domain-signin-fails-foreman-webui/27460/16 specifically this comment https://community.theforeman.org/t/kerberos-cross-domain-signin-fails-foreman-webui/27460/4
