

## Katello - Bug #4036

### Nutupane table within details seems to reflect some actions from main nutupane

01/16/2014 05:47 PM - Katello Issue Migration

<b>Description</b>	
<p>Currently in master there's a couple of things you can do on the main list that also occur when you open the details page of an item on that list (when the details page has some sort of nutupane as well).</p> <p>Within System Groups:</p> <ol style="list-style-type: none"><li>1. Search for a group</li><li>2. Click on a result</li><li>3. Click on "Systems" subnav</li><li>4. Notice that the search box for 'systems' has the same search term</li></ol> <p>Within System Groups:</p> <ol style="list-style-type: none"><li>1. Click select all</li><li>2. Click on a system group</li><li>3. Click on systems subnav</li><li>4. Notice that the systems subnav has its select all checked.</li></ol> <p>These things happen with any page whenever there is a nutupane on both the main list and details pages.</p> <p>Created: jsherrill on December 09, 2013 22:47 +00:00 Imported from <a href="https://api.github.com/repos/Katello/katello/issues/3480">https://api.github.com/repos/Katello/katello/issues/3480</a></p>

It looks like the cases mentioned in the description have been fixed. However, I still see another issue on the host collections page:

1. Go to the host collections page
2. Open up a host collection details page
3. Click select all on the host collections table
4. Notice that it doesn't select all

**#8 - 08/15/2014 01:33 PM - Walden Raines**

- Status changed from Ready For Testing to Closed

3. Click select all on the host collections table
4. Notice that it doesn't select all

This is now <http://projects.theforeman.org/issues/7114>.

Closing this bug as it has since been fixed/invalidated.
