Description

Using the nightlies starting from Sep 9, signo tosses this error:
```
/opt/rh/ruby193/root/usr/share/gems/gems/bundler-1.1.4/lib/bundler/spec_set.rb:90:in `block in materialize': Could not find fast_gettext-0.5.10 in any of the sources (Bundler::GemNotFound)
```
Hmm.
```
root@dlaxktlo301 signo]# rpm -qa | grep fast_gettext
ruby193-rubygem-fast_gettext-0.8.0-1.el6.noarch
```

My solution? rpm -ivh --nodeps ruby193-rubygem-fast_gettext-0.5.10-4.el6.noarch

The important thing here is that the 0.8.0-1 version was a dep of the nightlies. Except for signo, natch.
```
[root@dlaxktlo301 signo]# rpm -qa | grep signo
signo-0.0.21-1.el6.noarch
signo-katello-0.0.21-1.el6.noarch
```
