

## Katello - Bug #4077

### Empty collections in the API return an Error message to the user

01/16/2014 05:47 PM - Katello Issue Migration

<b>Status:</b> Closed

<b>Pull request:</b>	
<b>Description</b>	
<p>If you attempt to access an valid API endpoint for a collection (e.g. api/providers or products) and the collection is empty, the user is presented with an error message seen below. This is the same error message shown if a user attempts to access an non-existent entity (e.g. api/foo/bar). Slnce this is a collection in the API, the user should be presented with an empty list and not an error.</p>	
<pre>{   "displayMessage": "Resource not found on the server",   "errors": [     "Not found"   ] }</pre>
