#### Description

I'm not able to delete distributors that are linked to other orgs. Steps to repro:

- create a new org, let's say org B
- create a distributor in your acme org
- export a manifest from the new distributor, it doesn't need to have any subs on it
- import the manifest into org B
- go back to acme org, attempt to delete distributor
- :boom: 500 error :boom:

#### Comment 1

i can create/delete a distributor successfully if i don't export/import a manifest.

i can also create/delete a distributor successfully after exporting a manifest. the problem is when the manifest is imported back into the same candlepin
