<b>Description</b>	
<p>While attempting to reset admin's password on my environment I observed the following:</p> <p>Submitting the password reset form, with User: admin e-mail: root@localhost, generates a 302 redirecting the /katello/user_session (which in turn is a 200 response).</p> <p>Querying the DB (as I do not have e-mail configured) with:</p> <pre>katelloschema=# select password_reset_token from users where username='admin';</pre> <p>returns the value '64b9f799dc89264da7391685f38de6567480f6279d0b5b6ad9e0dac95e2828d7'.</p> <p>Browsing to <a href="https://172.31.21.75/katello/password_resets/64b9f799dc89264da7391685f38de6567480f6279d0b5b6ad9e0dac95e2828d7/edit">https://172.31.21.75/katello/password_resets/64b9f799dc89264da7391685f38de6567480f6279d0b5b6ad9e0dac95e2828d7/edit</a> generates a 302 Moved response to /katello/user_session/new with not response data, just a redirection.</p> <p>This observation is with Fedora 18, I have not tested with RHEL 6, but jsherrill appears to have reproduced this issue as well.</p> <p><i>Created: nigeljonez on May 15, 2013 03:01 +00:00</i> <i>Imported from <a href="https://api.github.com/repos/Katello/katello/issues/2288">https://api.github.com/repos/Katello/katello/issues/2288</a></i></p>	

#### History

##### #1 - 04/08/2014 06:38 PM - Eric Helms

- Status changed from New to Closed
- Triaged set to Yes

Katello, post engification, no longer carries password reset functionality (as that should be handled by the core) so this bug is no longer relevant.
