<b>Pull request:</b>		
<b>Description</b>		
When using GCE as a compute provider, spinning up a new instance results in;		
<pre>Fog error: Invalid value for field 'resource.networkInterfaces[0].accessConfigs[0].natIP': 'false' . Must be an IP address</pre>		
which fails the provisioning of a new instance. The external IP address option on the "virtual machine" can be selected or unselected, both result in the same error.		
This was also present in a previous version of fog but has since been fixed <a href="https://github.com/fog/fog/pull/2377">https://github.com/fog/fog/pull/2377</a>		
full error - <a href="http://fpaste.org/71294/05694951/">http://fpaste.org/71294/05694951/</a>		
<b>System Info:</b>		
GCE Instance - Debian GNU/Linux 7.3 (wheezy)		
foreman 1.4.0-RC2 (including foreman-compute & foreman-gce)		
puppet 3.4.2		
fog (1.19.0)		
google-api-client (0.7.1)		
ruby 1.9.3p194 (2012-04-20 revision 35410) [x86_64-linux]

Fixes #4179 - handled ephemeral public IP

With this commit, it will allow user to create ephemeral public IP as external\_ip field removed from APIs
