

Foreman - Bug #4200

Sosreport from RHEL 6.5 hangs with new foreman-debug

01/28/2014 09:46 AM - Lukas Zapletal

Pull request:	
Description	
<p>Sosreport (package sos) in RHEL 6.5 contains "foreman" plugin that calls foreman-debug to collect foreman-related information. In Foreman 1.4 we added interactivity (if interactive console is found). It can be disabled with -q flag, but sosreport from RHEL 6.5 does not do that which leads to hang.</p> <p>To reproduce try (on RHEL 6.5 with Foreman 1.4 RC2+):</p> <pre>sosreport -o foreman --batch</pre> <p>I am going to provide fix in foreman-debug, or I need to disable interactivity completely. I hope to find a fix.</p>
