- Tracker changed from Bug to Feature
- Subject changed from [RFE] Disable password Auto-complete to Disable password Auto-complete
- Status changed from New to Feedback

I think this is a duplicate of [#2607](#) - our root password type fields inside the application already do set autocomplete=off. We don't set it on login pages, as that would disable password managers.

#2 - 02/10/2014 08:39 PM - Lukas Zapletal

I also vote not to disable possibility to store passwords on login page.
