<b>Description</b>	
<p>Heya,</p> <p>just wanted to try Foreman 1.4 on a current CentOS 6.5 with all patches installed. After a 'yum install foreman-installer' i just ran the foreman-installer command, which almost immediately bails out. The relevant part of the log:</p> <pre>&lt;snip&gt; [DEBUG 2014-02-05 16:39:37 main] template[/usr/share/foreman-installer/modules/apache/templates/listen.erb]: Interpolated template /usr/share/foreman-installer/modules/apache/templates/listen.erb in 0.00 seconds [DEBUG 2014-02-05 16:39:37 main] Scope(Apache::Namevirtualhost[*:8140]): Retrieving template apache/namevirtualhost.erb [DEBUG 2014-02-05 16:39:37 main] template[/usr/share/foreman-installer/modules/apache/templates/namevirtualhost.erb]: Bound template variables for /usr/share/foreman-installer/modules/apache/templates/namevirtualhost.erb in 0.00 seconds [DEBUG 2014-02-05 16:39:37 main] template[/usr/share/foreman-installer/modules/apache/templates/namevirtualhost.erb]: Interpolated template /usr/share/foreman-installer/modules/apache/templates/namevirtualhost.erb in 0.00 seconds [ INFO 2014-02-05 16:39:37 main] /usr/lib/ruby/site_ruby/1.8/puppet/file_system/file.rb:152: [BUG] rb_gc_mark(): unknown data type 0x28(0x7e21790) non object [ INFO 2014-02-05 16:39:37 main] ruby 1.8.7 (2011-06-30 patchlevel 352) [x86_64-linux] [ INFO 2014-02-05 16:39:37 main] [ INFO 2014-02-05 16:39:40 main] sh: line 1: 2186 Done          echo '\$kafo_config_file="/etc/foreman/foreman-installer.yaml" \$kafo_add_progress=true include kafo_configure' [ INFO 2014-02-05 16:39:40 main]      2187 Aborted          (core dumped)   RUBYLIB=/usr/lib/ruby/gems/1.8/gems/kafo-0.3.11/lib/kafo/../../modules: puppet apply --verbose --debug --trace --color=false --show_diff --detailed-exitcodes --modulepath /usr/share/foreman-installer/modules:/usr/lib/ruby/gems/1.8/gems/kafo-0.3.11/modules [ INFO 2014-02-05 16:39:40 main] Puppet has finished, bye!
