Foreman - Bug #4287

Template associations on HG & Env is broken

02/06/2014 06:23 PM - Greg Sutcliffe

Status:	Closed		
Priority:	Normal		
Assignee:	Greg Sutcliffe		
Category:	Unattended installations		
Target version:	1.5.0		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

Seems like the template associations are using OR instead of AND.

reproduce:

- Ensure you have an os which can be provisioned, create a new host, use the OS, click Resolve Templates, see the default finish template
- Create a new finish template, associate it to a specific env & hg
- Create a new host, assign the OS, HG, and env. Observe Resolve templates correctly showing the new template will be used
- Change the env and resolve again, the output still shows the new template (despite the env not matching)
- Change the HG and resolve again, the output now correctly goes back to the default finish template
