Description In the Web UI, after navigating to a host, clicking Edit, and submitting a change (e.g. add a parameter), the UI displays the host summary page (e.g. https://foreman/hosts/&lt;hostname&gt;) but the URL in the browser shows https://foreman/hosts/&lt;hostname&gt;/edit . In this state, graphs do not render and doing a page reload, from this state returns to the Edit dialogs not the the host summary page.

This is for Foreman 1.4.0. Sorry, I missed the version dialog.

#2 - 05/12/2014 03:06 PM - James Whitt

Can also confirm that this is occurring in 1.4.2.

This is causing issues when I use the BMC tab, as it will never load the BMC information, always sitting at "Loading BMC information ...". If I change the URL back to "/hosts/myhost.something.com", then click the BMC tab, then it will work again.

I think some of this was fixed in 1.5.0 ([#5389](#)), but the graphs still don't appear to be loading. The BMC info should now work though.
