

Foreman - Bug #4369

RBAC UI - clicking a role in the UI should go to filters page

Description	
It is very frustrating to click a role in the list and be taken to a page to edit the name. From my usage so far, this is not a common use case. Predominantly I am interested in seeing the filters.

That was why the first column used to be search, not role :-). Should we change the order of columns again? Or do you suggest Role being a link to filters? Or not to be link at all?
