Description		
Visiting the filters list for "Viewer" shows a list:		
role https://localhost:3000/filters?role_id=5		
Search Resource Unlimited		
none Architecture Toggle_check Edit		
none Audit Toggle_check Edit		
No where is it shown what the actual filter is. Instead one mustclick each entry in the first column to see the filter is, for example, "view_architectures". Some better mechanism for examining roles is very much needed.

Note that "view_architectures" is permission and a particular filter can have more of them. In case of host, it can be up to 13 permissions.
