Description

There are 2 entries in the help text for uploading a manifest file:

```
# hammer subscription upload --help
Usage:
    hammer subscription upload [OPTIONS]

Options:
    --organization-id ORGANIZATION_ID Organization id
    --content CONTENT              Subscription manifest file
    --file MANIFEST                Subscription manifest file
    -h, --help                     print help
```

Which argument is the correct one? --content or --file?
