Pull request:	
Description	
<p>This PR allows user to import puppet classes from a specific environment manually, from both GUI and Rake.</p> <p>Developers can click a button to sync the classes they recently created/updated/removed in a specific environment to Foreman, without waiting for the lengthy full class/environment sync to be finished by "ruby193-rake puppet:import:puppet_classes[batch]"</p> <p>https://github.com/theforeman/foreman/pull/1204 https://github.com/theforeman/foreman/pull/1215</p>
