#### Description

Created a host (via api) in an org, using a domain not yet in that org. Next tried adding the domain to the org:

```
$ hammer organization add_domain --id 10 --domain-id 1
Environments You cannot remove environments that are used by hosts or inherited.
```

Info for host below (odd that org is not listed in info?)

```
$ hammer host info --id 1
Id: 1
Name: dhcp129-000.megacorp.com
