<b>Description</b>		
<p>When setting the value of a parameter, either the default or overriding it, a dropdown or auto-completion of possible values should be provided where the smart class parameter has a type or validator set.</p> <p>A parameter set to type boolean should provide the user with a true/false selection, or a parameter with a list validator should provide those as options.</p> <p>(<a href="https://bugzilla.redhat.com/show_bug.cgi?id=1070386">https://bugzilla.redhat.com/show_bug.cgi?id=1070386</a>)</p>
