Description

Notice that using the CLI (and therefore the API) to search for an organization by name fails:

```
# hammer -v organization list --search 'name=ACME_Corporation'
[ERROR 2014-02-27 17:51:54 Exception] Error: 400 Bad Request

Logs show:

```
Started GET "/katello/api/organizations?sort=&search=name%3DACME_Corporation" for 127.0.0.1 at 2014-02-27 17:51:54 -0500  
Processing by Katello::Api::V2::OrganizationsController#index as JSON  
Parameters: {"sort"=>"", "search"=>"name=ACME_Corporation", "api_version"=>"v2", "organization"=>{}}  
Authorized user admin(Admin User)  
Field 'name' not recognized for searching! (ScopedSearch::QueryNotSupported)  
Rendered api/v2/errors/param_error.json.rabl within api/v2/layouts/error_layout (0.6ms)  
Completed 400 Bad Request in 58ms (Views: 1.5ms | ActiveRecord: 13.9ms)
```

As per issue [#4486](#) the API is raising a massive error but katello's organization controller isn't passing the error back

History

#1 - 02/28/2014 08:55 AM - Dominic Cleal

- Description updated

Foreman's organizations controller returns JSON in the body of the error 400 response:

```
{  
  "error": {  
    "message": "Field 'name' not recognized for searching!",  
    "class": "ScopedSearch::QueryNotSupported"  
  }  
}
```

#2 - 06/04/2014 12:40 AM - Eric Helms

- Status changed from New to Closed

- Triaged set to No

Tested upstream and this appears to be returning the same format as Foreman now.

#3 - 06/05/2014 03:31 AM - Eric Helms

- Triaged changed from No to Yes

#4 - 08/21/2014 02:29 PM - Eric Helms

- translation missing: en.field_release set to 13
