

Foreman - Bug #4489

hammer user list --search only works for login

02/27/2014 11:34 PM - Og Maciel

Status: Feedback																					
Priority: Normal																					
Assignee:																					
Category: Search																					
Target version:																					
Difficulty:	Fixed in Releases:																				
Triaged:	Found in Releases:																				
Bugzilla link:	Red Hat JIRA:																				
Pull request:																					
Description																					
Should I be able to search for users by any other field other than login ?																					
<pre># hammer user list --search 'user'</pre>																					

<table border="1"><thead><tr><th>ID</th><th>LOGIN</th><th>NAME</th><th>EMAIL</th></tr></thead><tbody><tr><td>1</td><td>admin</td><td>Admin User</td><td>root@usersys.redhat.com</td></tr><tr><td>3</td><td>user1</td><td></td><td>user@example.com</td></tr><tr><td>4</td><td>user11</td><td></td><td>user@example.com</td></tr><tr><td>5</td><td>user2</td><td></td><td>user@example.com</td></tr></tbody></table>		ID	LOGIN	NAME	EMAIL	1	admin	Admin User	root@usersys.redhat.com	3	user1		user@example.com	4	user11		user@example.com	5	user2		user@example.com
ID	LOGIN	NAME	EMAIL																		
1	admin	Admin User	root@usersys.redhat.com																		
3	user1		user@example.com																		
4	user11		user@example.com																		
5	user2		user@example.com																		

<pre>[root@qetello01 ~]# hammer user list --search 'id=3' Error: 400 Bad Request [root@qetello01 ~]# hammer user list --search id=3 Error: 400 Bad Request [root@qetello01 ~]# hammer user list --search email=user@example.com Error: 400 Bad Request [root@qetello01 ~]# hammer user list --search 'email=user@example.com' Error: 400 Bad Request [root@qetello01 ~]# hammer user list --search name=user1 Error: 400 Bad Request [root@qetello01 ~]# hammer user list --search login=user1</pre>																					

<table border="1"><thead><tr><th>ID</th><th>LOGIN</th><th>NAME</th><th>EMAIL</th></tr></thead><tbody><tr><td>3</td><td>user1</td><td></td><td>user@example.com</td></tr></tbody></table>		ID	LOGIN	NAME	EMAIL	3	user1		user@example.com												
ID	LOGIN	NAME	EMAIL																		
3	user1		user@example.com																		

<pre>[root@qetello01 ~]# hammer user list --search login=user123 No data. [root@qetello01 ~]# hammer user list --search name='Admin User' Error: 400 Bad Request</pre>																					

History

#1 - 02/28/2014 08:57 AM - Dominic Cleal

- Status changed from New to Need more information

Can you provide production.log from these requests? 400 bad request is a server-side error, so it's an API bug.

#2 - 02/28/2014 03:51 PM - Og Maciel

- Status changed from Need more information to Feedback

Uploaded logs via built in rsync process: /tmp/foreman-debug-VXXbW.tar.xz

#3 - 02/28/2014 04:03 PM - Og Maciel

Newer logs found at /tmp/foreman-debug-R98fu.tar.xz

#4 - 03/03/2014 09:00 AM - Dominic Cleal

- *Project changed from Hammer CLI to Foreman*

- *Category changed from Hammer core to Search*

Ok, I see the issue. The fields available for searching users are:

- login
- firstname
- lastname
- mail (not email)
- admin
- last_login_on
- roles, usergroups
