<b>Description</b>	
The setting to surround strings that pass through i18n with "X" does not work on angular pages.	
<pre>/katello/systems#/systems window.___ = function() { return 'X' + i18n.gettext.apply(i18n, arguments) + 'X' }; Uncaught TypeError: Cannot call method 'apply' of undefined</pre>

##### Revision c89da046 - 03/21/2014 05:17 PM - Walden Raines

Fixes #4501: rename katello JS i18n/mark translated bastion strings.

There was a javascript error on all katello pages when mark\_translation was turned on. This was because katello was overwriting foreman's i18n global var with it's own global var. Renamed katello's global var to fix this.

Also added Xs around bastion strings marked for translation.
